

My day to day activity

- *Shift start time - 8AM or 9AM*
- *Email checking -> Smoke test result*
- *Jira board - prepare answer for stand up meeting*
- *Daily stand up meeting*

Early sprint

- *Sprint Planning meeting*
- *Analyze business requirement / user stories & AC*
- *Maintain automation BDD Cucumber framework*
- *Test scenario review (not common)*
- *Test case creation*

Mid sprint

- *Prepare test scripts (code)*
- *Executing Test cases manually & automatically*
- *Create bug report if there is any unexpected result*
- *Grooming meeting - giving points*

Late sprint

- *Demo*
- *Retro*
- *Code review*

Possible activities that can be anytime:

- *Brown bag session (lunch & learn)*
- *Mentoring session*
- *Happy hours*

Sample day to day activity answer:

My shift starts at 8am, first thing first I double **check the results of my smoke test**, make sure that the application is up and running. Then I am focusing on my emails which I received yesterday after I left my desk, to make sure that I am not missing anything from yesterday. Then I am **opening my jira board**, basically getting ready for my daily stand up which occurs at 9 am everyday. At stand up as a team we discuss what we did yesterday what we are working on right now and more importantly if there is anything that holding me back to do my job, impediments. After stand up I go back to my desk and depending on which part of sprint our team is my tasks differ.

Let's say **if it is early sprint** i would participate in **sprint planning** meeting where we plan exact user stories we need to complete in the sprint and identify out sprint goal. Also, I would work on maintaining my framework, **participate** in test **scenario reviews**, and I start **create my test cases**.

Towards the **mid sprint**, and I would've start **execution** on my test cases manually & automatically. I might create bug reports if I find any bug. I have **grooming to estimate points** to upcoming sprint stories.

If it is **end of the sprint** I would be busy for getting reports ready and participate in **demo meeting**. I we have **retro meeting** at the end of the sprint too.

Every **Tuesdays** we have **born bag session** where I share my coding and automation experience with my developers. and every **Fridays** we have **code review meeting** among automation testers of the project.

So this is basically my day, oh I actually forgot about coffee :) I do not start my day without a cup of coffee.
