

Return method

How to return a value from method?

- A method can return a value by using the return statement followed by an expression or a value.

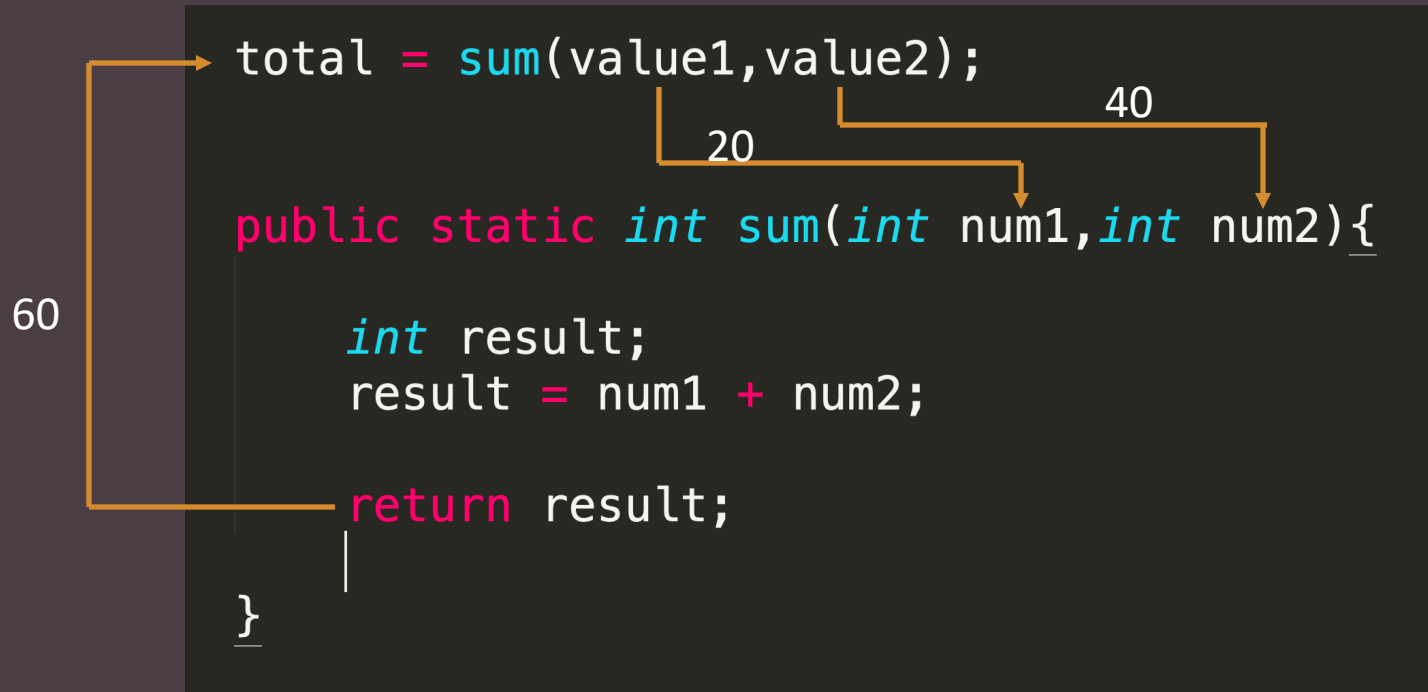

Return Type

↓

```
public static int sum(int num1, int num2){  
    int result;  
    result = num1 + num2;  
    return result;  
}
```

Return Expression →

Calling a Value-Returning Method

Remember:

- Returning value MUST match with the return Type of the method
- If the return type of the method is void, the method cannot return any value
- Closing statement MUST be ended with a return statement.
- Return statement exits the method.
